NEW YORK, June 12.-Sugar asserted its leadership of the market quite emphatically to-day, and the tone of the market was almost wholly dependent upon developments in it. The obvious take profits on Sugar was the potent influence in causing realizing sales in other stocks. There was vigorous manipulation in Sugar to hold it at the high level, and even to raise that level, on the strength of benefits to accure to the company from the sugar schedule adopted by the Senate. But those who have benefited by the week's rise in sugar argue that the prebe less favorable, rather than favorable offing the mate and throwing the body overboard.

The market has been sus-tained all week by the aggressive strength of Sugar, growing out of the agreement of the caucus of Senate Re-publicans upon a sugar schedule which is viewed with approval by the friends of the Sugar Company. This being the case, it was natural that the whole market should give way to a degree under the break in Sugar to-day, on re-alizing sales. But the week, neverthealizing sales. But the week, nevertheless, represents, as a whole, another step forward in the progress towards a higher range of values, which has been going on ever since the Senate took up the tariff bill, and demonstrated that it could dispose of it with reasonable promptitude. This, with the decision of the Surgeon Court against the right of he Supreme Court against the right of the Interstate Commerce Commission to fix railroad rates, gave a distinct impetus to the market, which has endured

A most striking feature of the week's rule. A most striking feature of the weeks market has been the comparative inactivity, but firmness, of the Granger stocks, which strongly led the early improvement. They have halted during the past week, while other groups in the market were taken in hand and brought to the lay level. Professional traders up to their level. Professional traders have wrought this result largely by the selling of Grangers to take profits, and with the favorable quarterly statement, of the company, and the increased earnings of Manhattan, served to take these

The market was governed to a considerable extent by the developments operating to enhance share values.
